BRAND GUIDELINES · OCTOBER 2026

Visual *identity*

INTRODUCTION

Enjoy Morocco, *Your Way*

Rassma Tours reads like a boutique travel concierge, not a booking engine. Tangier is our home base; the journey reaches across Morocco, shaped around each traveller. The identity should convey three qualities at first glance.

01

Quiet luxury

Large photography, editorial serif type, generous white space, a restrained palette. No shiny gold, no ornament.

02

Human warmth

A first-person-plural voice, real places — cafés, markets, alleys — rather than postcard views.

03

Authenticity

Places named precisely, verifiable facts, no unsourced promises.

THE SUN RISES OVER THE STRAIT

ATLANTIC · WEST

MEDITERRANEAN · EAST

THE KHATAM, EIGHT-POINTED STAR

01 · THE SYMBOL

The *Strait*

The symbol starts from the khatam, the Moroccan eight-pointed star made of two squares rotated 45°, reinterpreted with restraint.

The solid star roots the brand in Moroccan heritage, without arabesques or decoration.

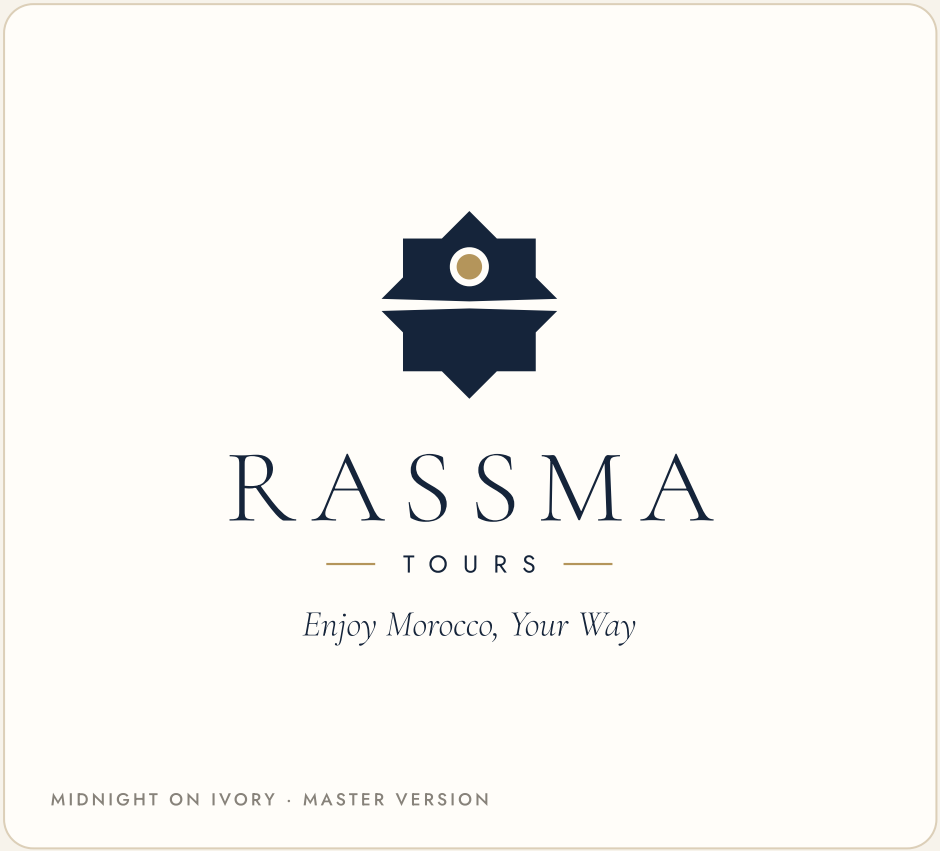

The channel splits the star from the western point (Atlantic) to the eastern point (Mediterranean) and narrows at the centre, like the Strait of Gibraltar off Tangier — the gateway to Morocco.

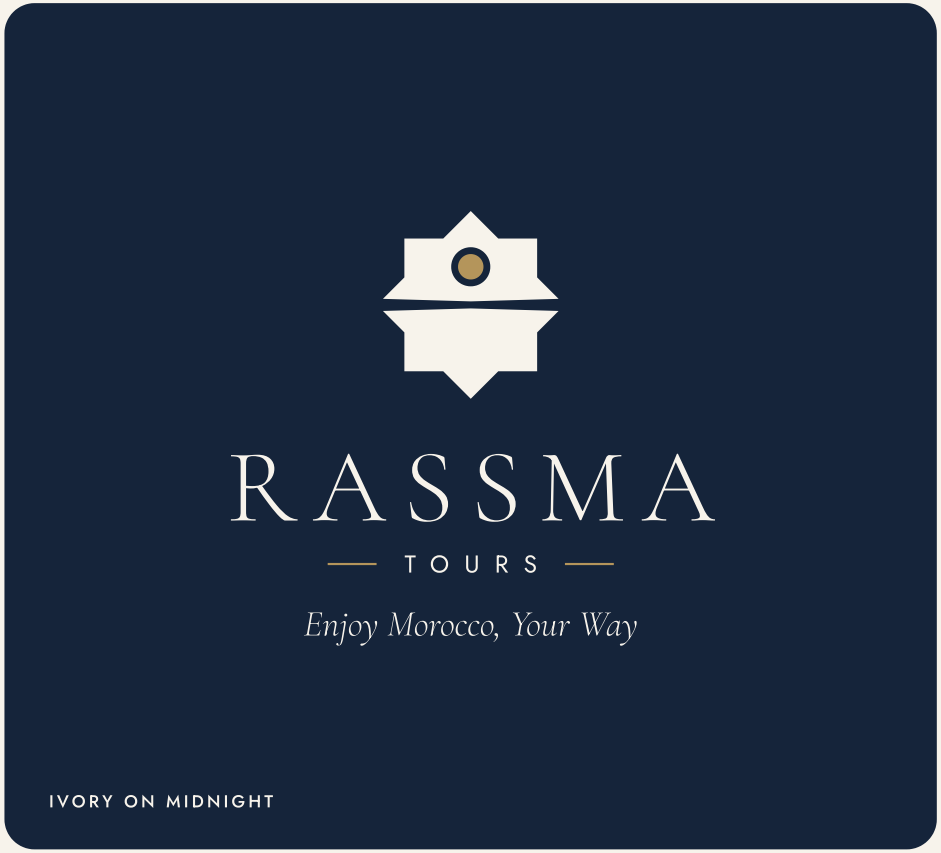

The sun, cut out in negative with a brass disc, rises above this horizon. It is the only touch of brass in the symbol.

A strong silhouette, legible in one colour and down to 16 px. Chosen from three routes: *Zellige Horizon*, *The Strait*, *Bab*.

Symbol, name and *tagline*

"RASSMA" in Cormorant Garamond 600, "TOURS" in widely tracked Jost 500 between two brass rules, and the tagline "Enjoy Morocco, Your Way" in Cormorant italic. This is the master version: use it whenever space allows.

Horizontal version

For the website header, email signatures, banners and any format where height is limited. The tagline is dropped and the symbol sits to the left of the name.

SYMBOL SCALE

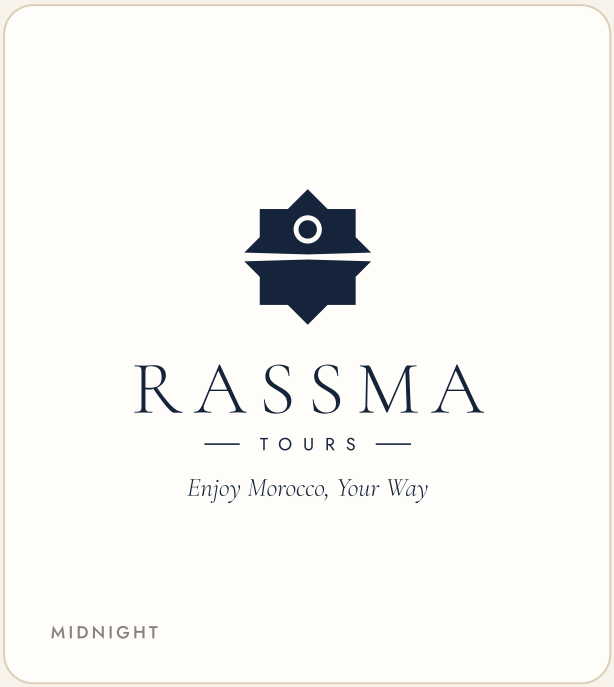

FAVICON · SMALL-SIZE CUT

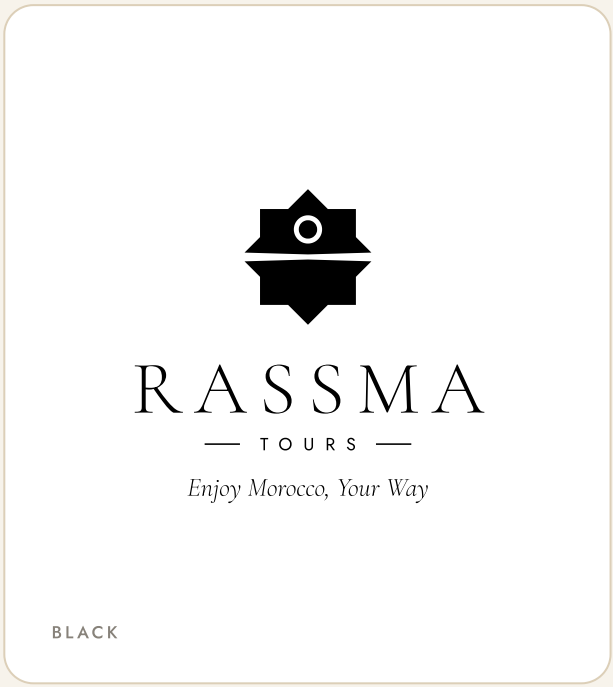

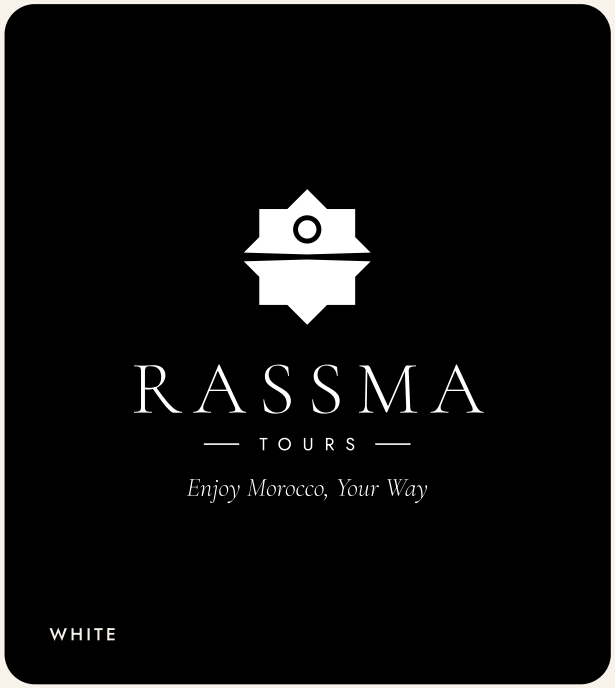

The channel and the sun's ring are opened up to stay crisp at 16 px.

One colour, *same silhouette*

For engraving, stamps, embroidery, screen printing, black-and-white documents and busy photographic backgrounds. The sun takes the same colour as the rest of the logo.

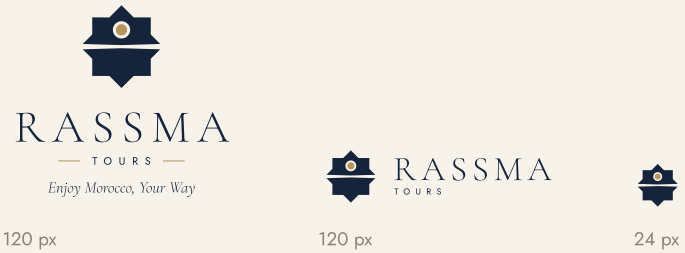

Clear *space*

Keep at least a quarter of the symbol's height free around the logo (about four times the channel height). No text, page edge or image may enter this area.

Minimum *sizes*

Primary logo	120 px wide · 30 mm in print
Horizontal logo	120 px wide · 30 mm in print
Symbol alone	24 px · 8 mm
Favicon	16 px, using the small-size cut

What to *avoid*

✕ Don't rotate the logo or the star

✕ Don't stretch or distort

✕ Don't add shadows or effects

✕ Don't recolour the sun outside the palette

✕ Don't set the logo in brass or gold

✕ Don't place the colour logo on a busy photo

Always use the logo from the supplied files — never redraw or rearrange it.
